

The Community Initiative Award

“In recognition of the Kinesiology student(s) who, while contributing to the Acadia community, is also engaged in the wider community through program leadership, coaching, or volunteering, which enhances not only their own life, but also the lives of those they are involved with. While existing programs on campus are an important part of the student experience, this person volunteers their time above and beyond these organized programs taking pride in, but not expecting recognition for all they do to enhance the life of others.” - inspired by Dr. René Murphy
